FULL-STACK SOFTWARE DEVELOPER

I've evolved into a Software Engineer after a lifetime of producing theater and tending bar. Daily, I utilize the skills I've cultivated in those industries (teamwork, leadership, problem solving, organization) to strengthen my coding capabilities and I look forward to offering efficient solutions and writing scalable code as a Developer on your team.

TECHNICAL & INTERPERSONAL SKILLS

Programming Languages: JavaScript, Typescript, PostgreSQL, Mongoose, JSON, EJS

Libraries and Frameworks: React, Express

Databases and other: MongoDB, RESTful Routing, JSON API, SQL, OOP, ORM and ODM Database Structuring

Soft Skills: Collaboration, Communication, Adaptability, Organization, Time Management, Problem Solving

TECHNICAL PROJECTS

ShelterBy- [GitHub](#) | [App](#) - PERN Stack CRUD SPA | React | TypeScript | PostgreSQL/SQL

ShelterBy is a solution to overflow in animal shelters, providing direct lines of communication among a community.

- Created a database that holds all dogs created by users that need a home
- Allowed users list dogs they are interested in via M:M association
- Listed all families that are interested in a dog, so an owner can see what attention the dog is getting

CAST- [GitHub](#) | [App](#) - MERN Stack CRUD SPA | React | JSX | Mongoose/MongoDB

Usable as Talent or a Casting Director, CAST is one place for those in entertainment to access a pool of talent.

- Presented option to sign up as a CD or Talent
- Enabled a CD to access, search, and filter all the talent in the database
- Offered Talent to set up a full profile to reflect their resume
- Collaborated with two others to develop application

Fantasy Drag Race- [GitHub](#) | [App](#) - MEN Stack CRUD SPA | JavaScript | EJS | Mongoose/MongoDB

Join a league with your friends and draft your dream team of queens from the current season- highest scoring team wins!

- Established a database of queens from the current season
- Presented queens on a page for a user to view and draft from
- Calculated the user's total points based on each queen's wins/losses for the week's episode
- Ranked all the teams in the league on a Rankings page

Boss Battles - [GitHub](#) | [App](#) - HTML | JavaScript | CSS

In this text-based boss-battle adventure, users are pitted against 5 bosses, earning stat-boosting loot after each victory.

- Created a simple battle simulator utilizing randomization and JavaScript classes
- Offered the user decision making power over starting statistics and how to improve them after each win

EXPERIENCE

Havoc Movement Company, Director of Education/Casting

Atlanta, GA, 6/2019 - Current

- Create cohesive and easily digestible casting breakdown to entice community
- Schedule and orchestrate auditions and callbacks
- Provide professional input on casting decisions
- Schedule and fill classes provided by the company
- Field any communication between students and the company
- Track participation, payments, progress, and testing qualification

LendFriend, Production Manager, Team Lead
